Mr. Chris Davey
BOSTON SCIENTIFIC CORP.
480 Pleasant Street
Watertown, MA 02172

Dear Chris:

Thank you for the opportunity to provide this quotation for the Medi-Tech Peelable Sheath Set. When we first received this request for quotation we were under the mistaken impression that you wanted the exact configuration as the drawing that was provided which would have required extensive tooling expense. Subsequently, we have learned that this is not the case and are pleased to submit this quotation for a product of our design.

The device we are proposing is in the final stages of development and we think that it has superior features to what is presently available on the market. Some of the features include ergonomic hub design, unique locking mechanism between sheath and dilator, and the ability to manually block the flow in a positive and comfortable manner after removal of the dilator. The manufacturing process is designed to provide a product with superior sheath to dilator transition and a consistent lot to lot peeling action.

The principals of Xentek Medical have extensive experience in the design, development and manufacture of this type of medical device. If you should have any specific dimensional requirements this product could generally be tailored to your specifications.

XENTEK MEDICAL, INC.
